

# Smartphone Flight Simulators

## *Apps for Android:*

***Fixed Wing*** - Absolute RC Flight Simulator

***Multi-rotors*** - QuadcopterFX Simulator

## *Apps for IOS:*

***Fixed Wing*** - Absolute RC Flight Simulator

***Multi-rotors*** - Sky Viper Flight Simulator

Using these flight sims is not a requirement for the course, but it will help get you a better feel for what manually flying some of these aircraft is like. We highly encourage you all to play around with these apps when you have some time and have fun! For those of you who will be joining us in the CDDT Level 2 course, you'll be able to fly some of these drones in person and having this flight sim time is good preparation for it.

Please post any questions you may have regarding any of these flight sims to the "Flight operations 1 forum" and one of us will be sure to help you out as soon as possible.
